Access Control

Establish **Zero Trust** access model to modern and legacy assets using identity & network controls

Microsoft Entra

Identity Admin, Identity Architect, Identity Security

- **Entra ID (Formerly Azure AD)**
 - Multifactor Authentication
 - Conditional Access
 - Application Proxy
 - External Identities / B2B & B2C
 - Internet/Private Access
 - Identity Governance
 - and more..
 - **Windows Hello for Business**
 - **Microsoft 365 Defender**
 - Microsoft Defender for Identity
 - Microsoft Defender for Cloud Apps
 - **Microsoft 365 Lighthouse** [multi-tenant]
 - **Azure Lighthouse**
 - **Azure Bastion**
 - *Azure Administrative Model*
 - Portal, Management Groups, Subscriptions
 - Azure RBAC & ABAC
- Network Security*
- **Azure Firewall**
 - **Azure Firewall Manager**
 - **Azure DDoS**
 - **Azure Web Application Firewall**
 - *Azure Networking Design*
 - Virtual Network, NSG, ASG, VPN, etc.
 - PrivateLink / Private EndPoint

Endpoint / Device Admin

- **Microsoft Intune**
 - Configuration Management
- **Microsoft Defender for Endpoint**

Security Operations

Detect, Respond, and Recover from attacks; Hunt for hidden threats; share threat intelligence broadly

Incident preparation

Microsoft Defender

Security Operations Analyst

Microsoft Defender XDR

- Microsoft Defender for Endpoint
- Microsoft Defender for Office 365
- Microsoft Defender for Identity
- Microsoft Defender for Cloud Apps
- Microsoft Entra Identity Protection
- **Microsoft Defender for Cloud**
 - Microsoft Defender for DevOps
 - Microsoft Defender for Servers
 - Microsoft Defender for Storage
 - Microsoft Defender for SQL
 - Microsoft Defender for Containers
 - Microsoft Defender for App Service
 - Microsoft Defender for APIs
 - Microsoft Defender for Key Vault
 - Microsoft Defender for DNS
 - Microsoft Defender for open-source relational databases
 - Microsoft Defender for Azure Cosmos DB
- **Microsoft Security Copilot**
- **Microsoft Sentinel**
- **Microsoft Security Experts**
- *Microsoft Incident Response Detection and Response Team (DART)*

Threat intelligence Analyst

- **Microsoft Defender Threat Intelligence (Defender TI)**
- **Microsoft Sentinel**

Security Governance

Protect sensitive data and systems. Continuously discover, classify & secure assets

Security architecture

- *Microsoft Cybersecurity Reference Architecture*
<https://aka.ms/MCRA>

Posture management, Policy and standards, Compliance management

- **Microsoft Defender for Cloud**
 - Secure Score
 - Compliance Dashboard
 - Azure Security Benchmark
- **Azure Blueprints**
- **Azure Policy**
- **Microsoft Defender External Attack Surface Management (MD-EASM)**
 - *Azure Administrative Model*
 - Portal, Management Groups, Subscriptions
 - Azure RBAC & ABAC
- **Microsoft Purview**
 - Compliance manager

Data security

- **Microsoft Purview**
 - Information Protection
 - Data Loss Prevention
- **Microsoft 365 Defender**
 - Microsoft Defender for Cloud Apps

People security

- **Attack Simulator**
- **Insider Risk Management**

Privacy Manager

- **Microsoft Priva**

Asset Protection

Continuously **Identify**, measure, and manage security posture to reduce risk & maintain compliance

Infrastructure and endpoint security, IT Ops, DevOps

- **Microsoft Defender for Cloud** (including Azure Arc)
- **Azure Blueprints**
- **Azure Policy**
- **Azure Firewall**
- **Azure Monitor**
- **Azure Web Application Firewall**
- **Azure DDoS**
- **Azure Backup and Site Recovery**
 - *Azure Networking Design*
 - Virtual Network, NSG, ASG, VPN, etc.
 - PrivateLink / Private EndPoint
- **Azure Resource Locks**

OT and IoT Security

- **Microsoft Defender for IoT (& OT)**
- **Azure Sphere**

Innovation Security

Integrate Security into DevSecOps processes. Align security, development, and operations practices.

Application security and DevSecOps

- (Same as Infrastructure Roles)
- **GitHub Advanced Security**
- *Azure DevOps Security*

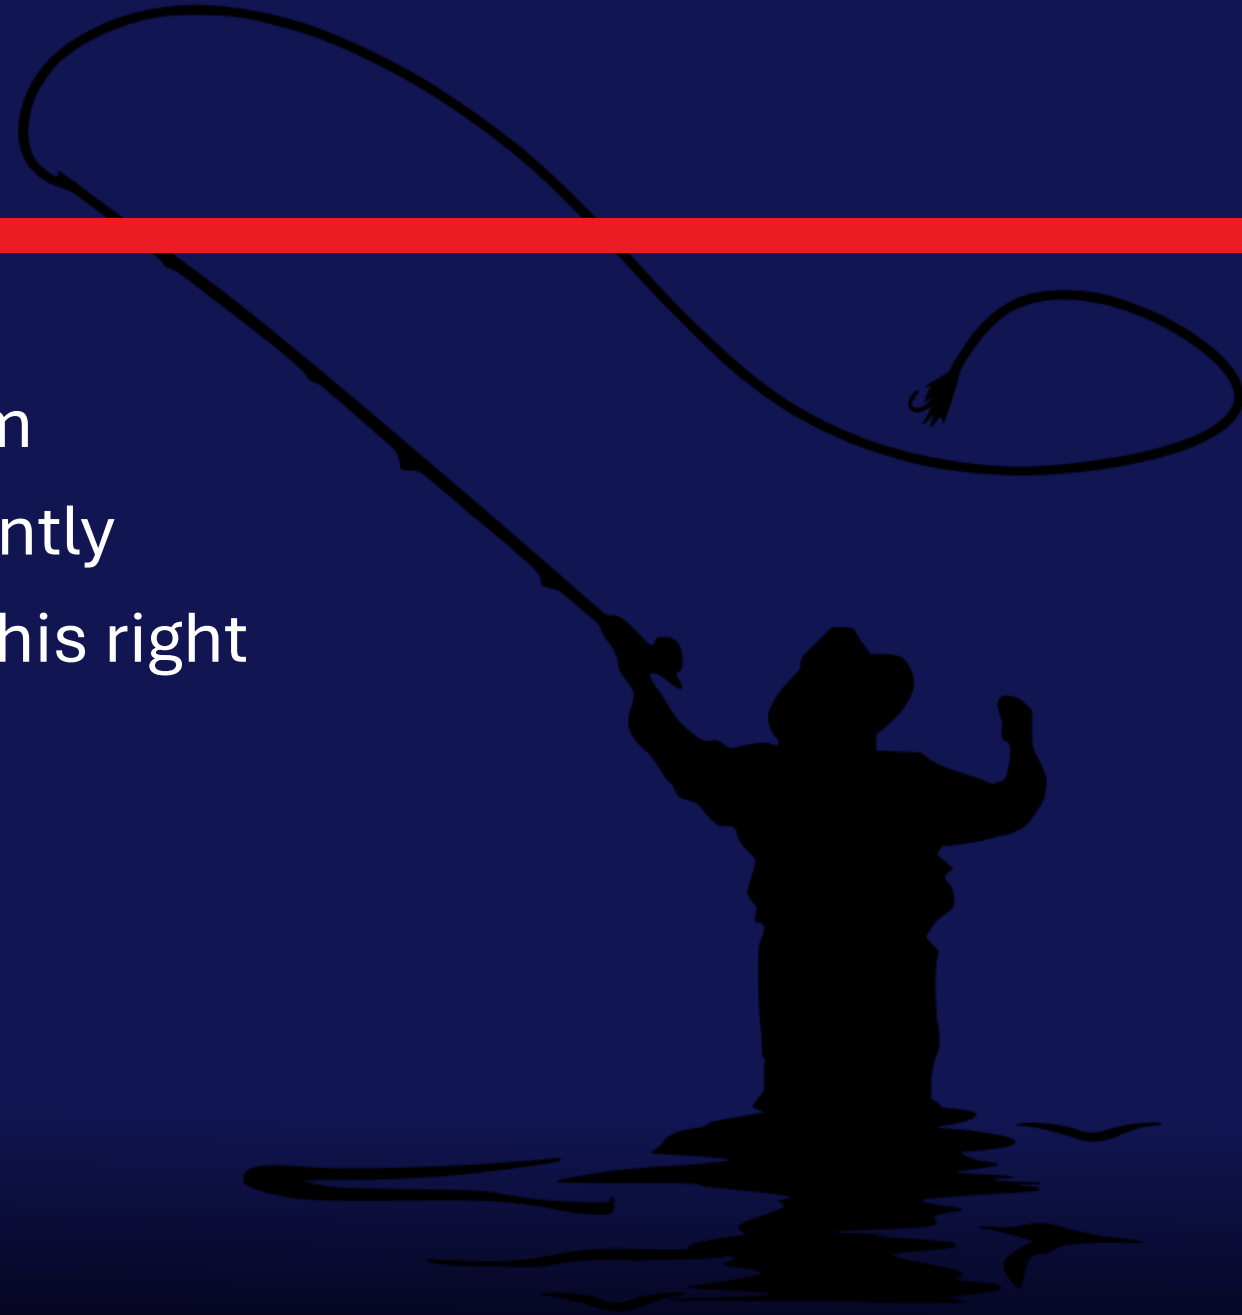

Agenda

- ◆ Main content:
 - ◆ Cover Main SKUs
 - ◆ Show Microsoft Value
 - ◆ Highlight some Gotchas
- ◆ Quiz
- ◆ Open to rabbit holes

Why are we here?

- ◆ Everyone has Microsoft Licenses
- ◆ Almost nobody understands them
- ◆ Microsoft Changes things constantly
- ◆ Your budget depends on getting this right

Moderator-curated highlights from this week's Microsoft 365 changes

Microsoft 365 Copilot: Legal Agent for Word

Microsoft 365 introduces Legal Agent for Word, a Copilot feature for US legal professionals in the Frontier Public Preview (April 2026). It helps review contracts, identify risks, compare clauses to playbooks, and generate tracked-change edits within Word, requiring no extra installation beyond licensing and enrollment.

MC1296877 · [Microsoft 365 apps](#) · [Microsoft Copilot \(Microsoft 365\)](#) · [New feature](#) · [User impact](#) 01/05/2026

Introducing Calendar Agent capabilities in Microsoft 365 Copilot

Microsoft 365 Copilot introduces Calendar Agent capabilities to automate calendar management via natural-language instructions, helping users accept, follow, decline, or delete meetings. Rolling out late April to early May 2026, it respects existing policies, user settings, and compliance, with no new admin controls added.

MC1296874 · [Microsoft Copilot \(Microsoft 365\)](#) · [Microsoft 365 Copilot Chat](#) · [New feature](#) · [User impact](#) 01/05/2026

Microsoft 365 Copilot: Anthropic models available when editing Word documents

Microsoft 365 Copilot will add Anthropic AI models as an option for Word document editing, available worldwide by late May 2026. Enabled by default outside the EU, EFTA, and UK, and disabled by default within these regions, admins can control this setting while existing security and compliance standards remain.

MC1296489 · [Microsoft 365 apps](#) · [Microsoft Copilot \(Microsoft 365\)](#) · [New feature](#) · [User impact](#) 30/04/2026

Microsoft 365 Copilot (Premium): Teams meetings as a reference in Copilot Notebooks

Microsoft 365 Copilot (Premium) will integrate Teams meeting content—transcripts, chats, and shared files—into Copilot Notebooks, enhancing context-based insights. Rolling out from April to May 2026, it respects existing permissions and governance, requires no admin setup, and is enabled by default for licensed users.

MC1296488 · [Major Change](#) · [Microsoft 365 apps](#) · [Microsoft Copilot \(Microsoft 365\)](#) · [New feature](#) · [User impact](#) 30/04/2026

Microsoft Teams: Retirement of Together mode

Microsoft Teams will retire Together mode in meetings starting early June 2026, completing by late June 2026. Together mode and custom scenes will be removed, with gallery view as the primary layout. No admin action is needed, but users should be notified and documentation updated accordingly.

The Takeaways from this session

- ◆ Wow that was just a Microsoft sales pitch
- ◆ But they did have a point
- ◆ I should see if these products can replace third-party stuff
- ◆ Wait, did my MS rep rip me off?
- ◆ That was pretty useful

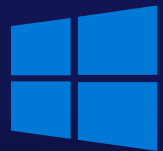

What *actually* is a Microsoft License?

- Your right to use a service that Microsoft offers – [Agreement](#)
- Might be a single app, right-to-use, or one/many online cloud services

Windows Server 2008 R2

Hierarchy of cybersecurity needs

Drawing inspiration from Maslow's hierarchy of needs, this graphic illustrates a prioritization of cybersecurity, starting with the most basic need: protecting identities. AI has a role at each tier, underscoring its potential to enhance security measures. Cultivating a robust security culture within the organization, helps ensure the technological defenses and human practices evolve in concert to mitigate threats effectively.

→ AUTOMATE SECURITY OPERATIONS Automating security operations is the holistic approach to building on perspectives and insights across all layers in the pyramid.	→ IMPACT... Automating processes at scale creates new opportunities for insights as well as relief for stressed defenders.
→ DETECT AND REMEDIATE THREATS Monitoring your ecosystem to identify anomalous activity and contain threats.	→ IMPACT... The ability to identify and respond quickly can limit lateral movement, contain damage to assets and deny persistence.
→ SECURE DIGITAL ASSETS Digital assets, whether code, traditional data stores, and now generative AI models are all key components of modern workloads.	→ IMPACT... Modern workloads deliver the value-add to end users who increasingly rely on their integrity and availability.
→ PROTECT ENDPOINTS Protected endpoints include the multiple dimensions of devices in use today – from PCs and mobile devices, to network and operational technology (OT), and servers in datacenters.	→ IMPACT... Effective endpoint protection can limit the repercussions of unauthorized access.
→ PROTECT IDENTITIES "Attackers don't break in, they log in." Credentials for both individuals and machines are the perimeter of the modern attack surface.	→ IMPACT... Strong identity security can greatly reduce risk exposure—particularly for ransomware attacks.

Your priority list

Copilot | ???

Data Protection | DLP + Sensitivity Labels

Privileged Access | Entra P2

Endpoint Security | Intune

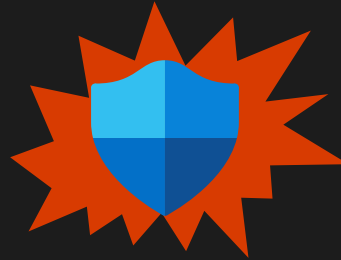

Email Threat Protection | Defender for O365

Conditional Access | Entra

Attack Timeline

'Left of Boom'

Prevent or lessen impact of attacks

'Right of Boom'

Rapidly and effectively manage attacks

The job will never be 'done' or 'perfect', but it's important to keep doing (like cleaning a house)

Best of breed vs best of suite

Used to assembling “best of breed”
into a custom solution

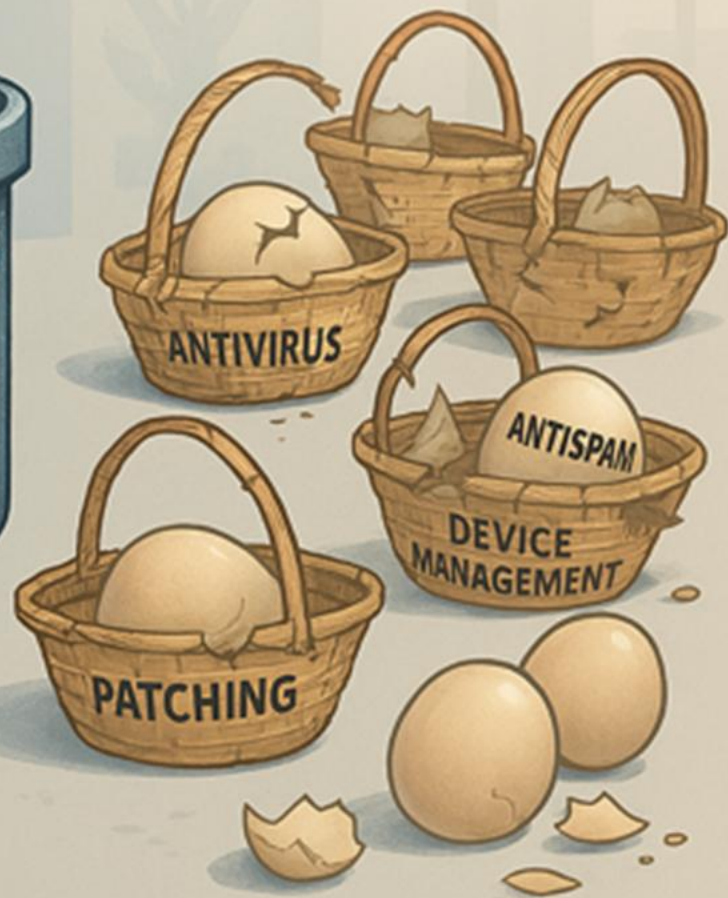

Microsoft has already integrated
security into our products

AFTERMARKET UPGRADES:

Microsoft integrates with
existing capabilities

**Not all baskets
are built equal.
Choose wisely.**

Best of breed adds up...

- ♦ Building up capability outside of the main SKUs is not an effective use of cash

Windows Update for Business		✓
Windows Virtualization Rights 		✓
Windows 11 Support Period		36 months

Enterprise: E3 vs E5

E3 includes:

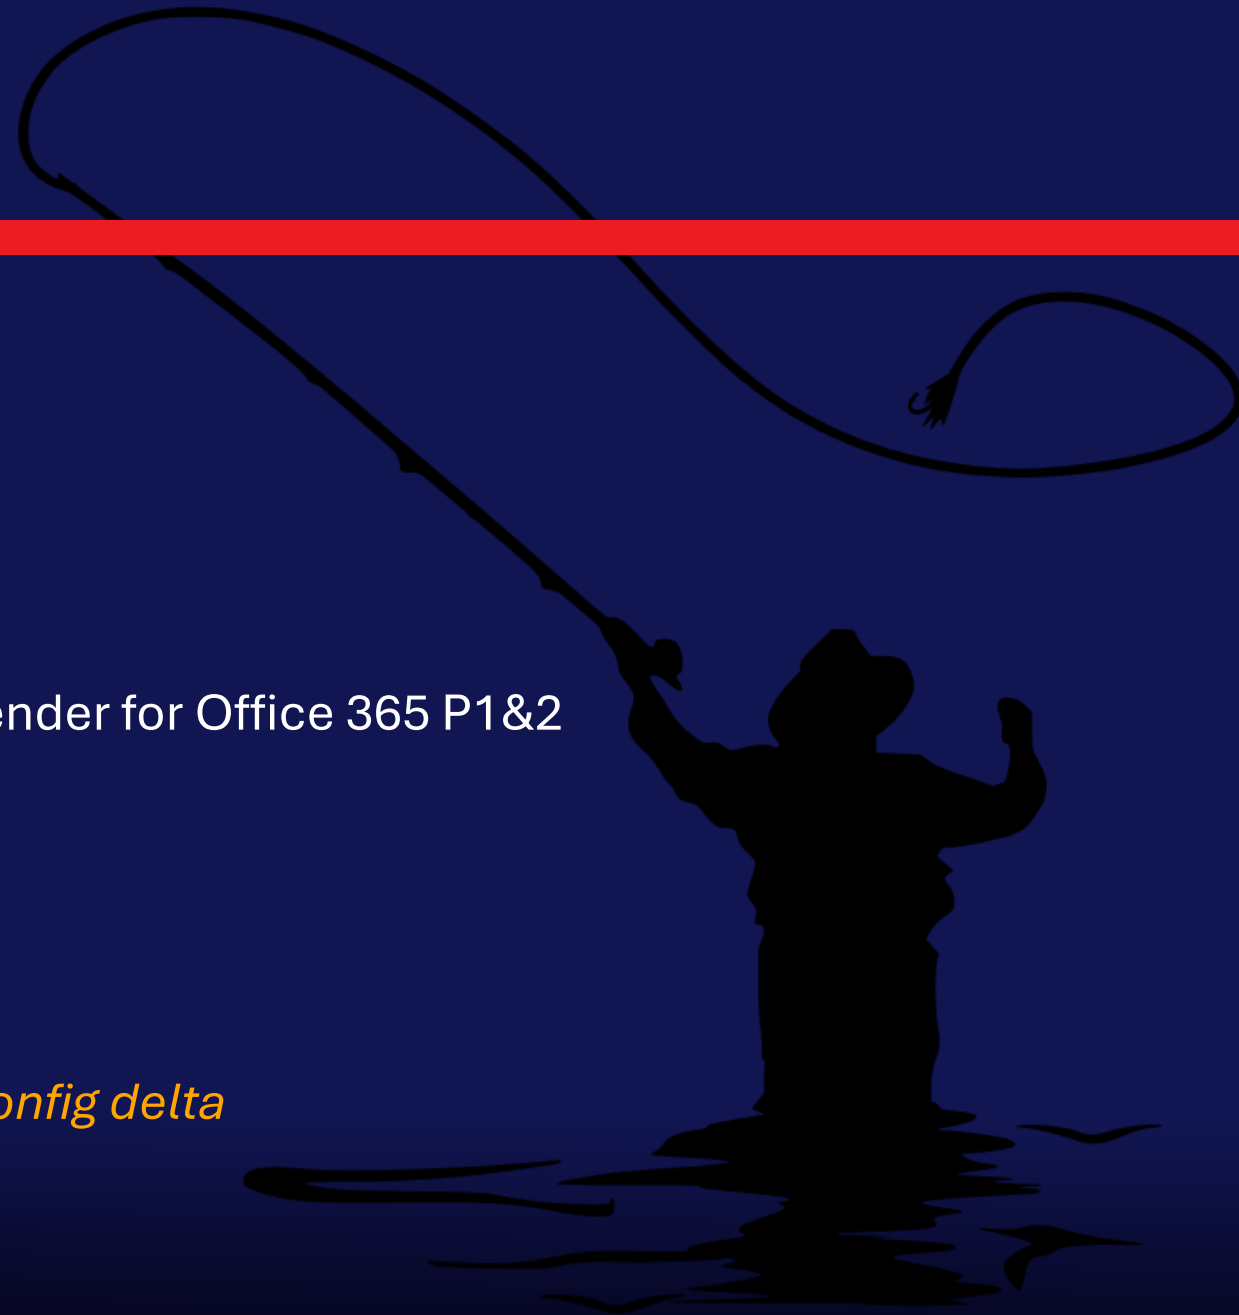

- Entra ID P1 + Intune P1 + DFE P1
- Exchange P2 + core protections

E5 adds:

- Entra ID P2 + Defender for Endpoint P2* + Defender for Office 365 P1&2
- Purview + Phone System
- Power BI Pro
- 0.4 Copilot Security SCUs

Nearly double the price, but surprisingly small config delta

E3 blocks threats. E5 gives insights + response.

What about E7?

Microsoft 365 E7: The Frontier Worker Suite

		 Microsoft 365 E5 (w/Teams)	 Microsoft Entra Suite	 Microsoft 365 Copilot	 Microsoft Agent 365	 Microsoft 365 E7 (w/Teams)
		\$60 ¹	\$12	\$30	\$15	\$99 ²
Productivity	Microsoft 365 apps: Create and refine work across the apps people know and love	•				•
	OneDrive & SharePoint: Share, manage, and collaborate on content across teams	•				•
	Teams: Meet, chat, and call	•				•
	Windows: Secure, manage, and run work across enterprise devices	•				•
	Teams Phone: Cloud-based phone system built into Teams	•				•
	Power BI Pro: Turn data into shared, actionable insights	•				•
Security & Compliance	Entra: Identity and access management	• P2	• Suite			• Suite
	Defender: Endpoint, email, identity, and cloud threat protection	•				•
	Purview: Data security and compliance (ex. information protection, DLP, insider risk)	•				•
	Intune: Endpoint and device management	•				•
AI	Copilot: AI built into core productivity apps and Teams	○		•		•
	Copilot Studio & Agent Builder: Build, deploy, and scale custom AI agents	○ Metered		•		•
	Agent flexibility: Choose from pre-built agent library or access 3P marketplace			•		•
	Work IQ: AI grounded in personal and work data (incl. 3P data via connectors)	○		•		•
Agent Management	Agent 365: Observe, monitor and manage agents in real time				•	•
	Agent 365: Govern agents throughout their lifecycle				•	•
	Agent 365: Secure and protect all agents across your enterprise				•	•

1: \$51.45 w/o Teams | 2: \$90.45 w/o Teams

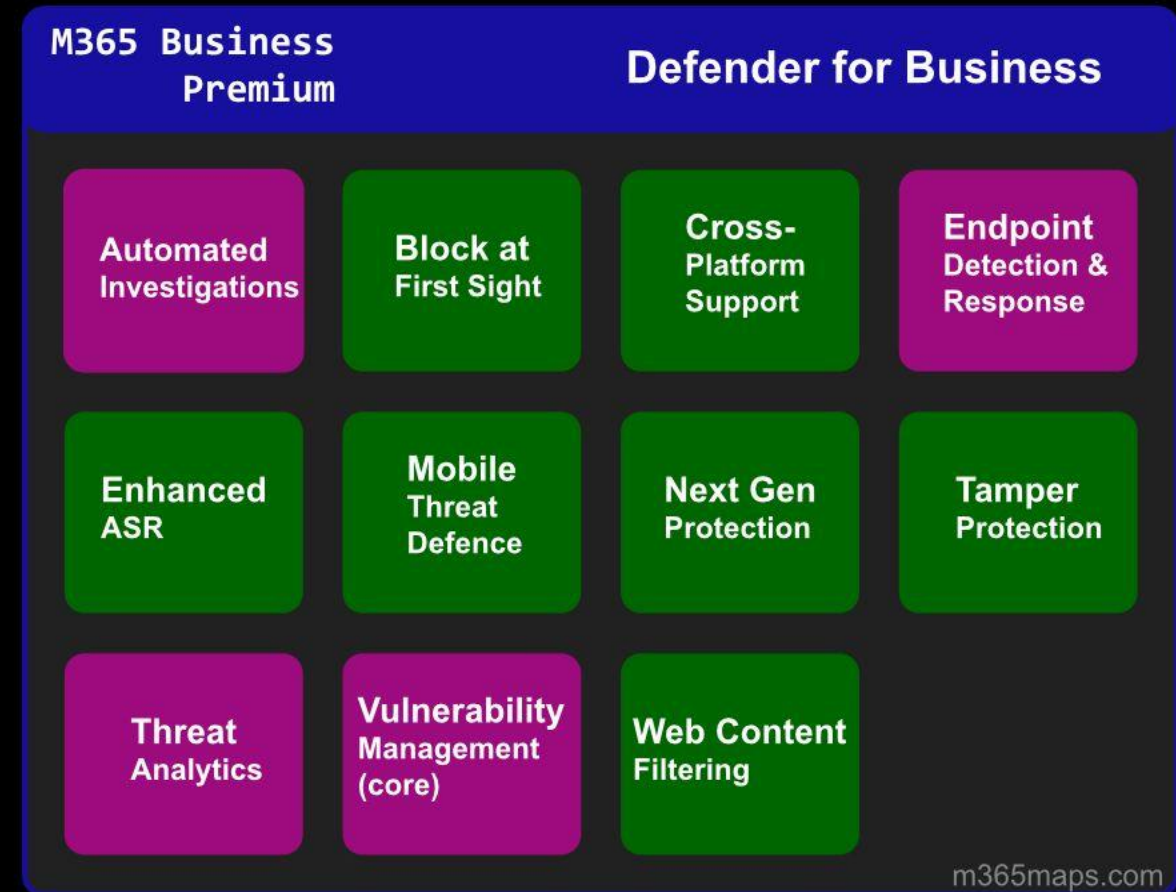

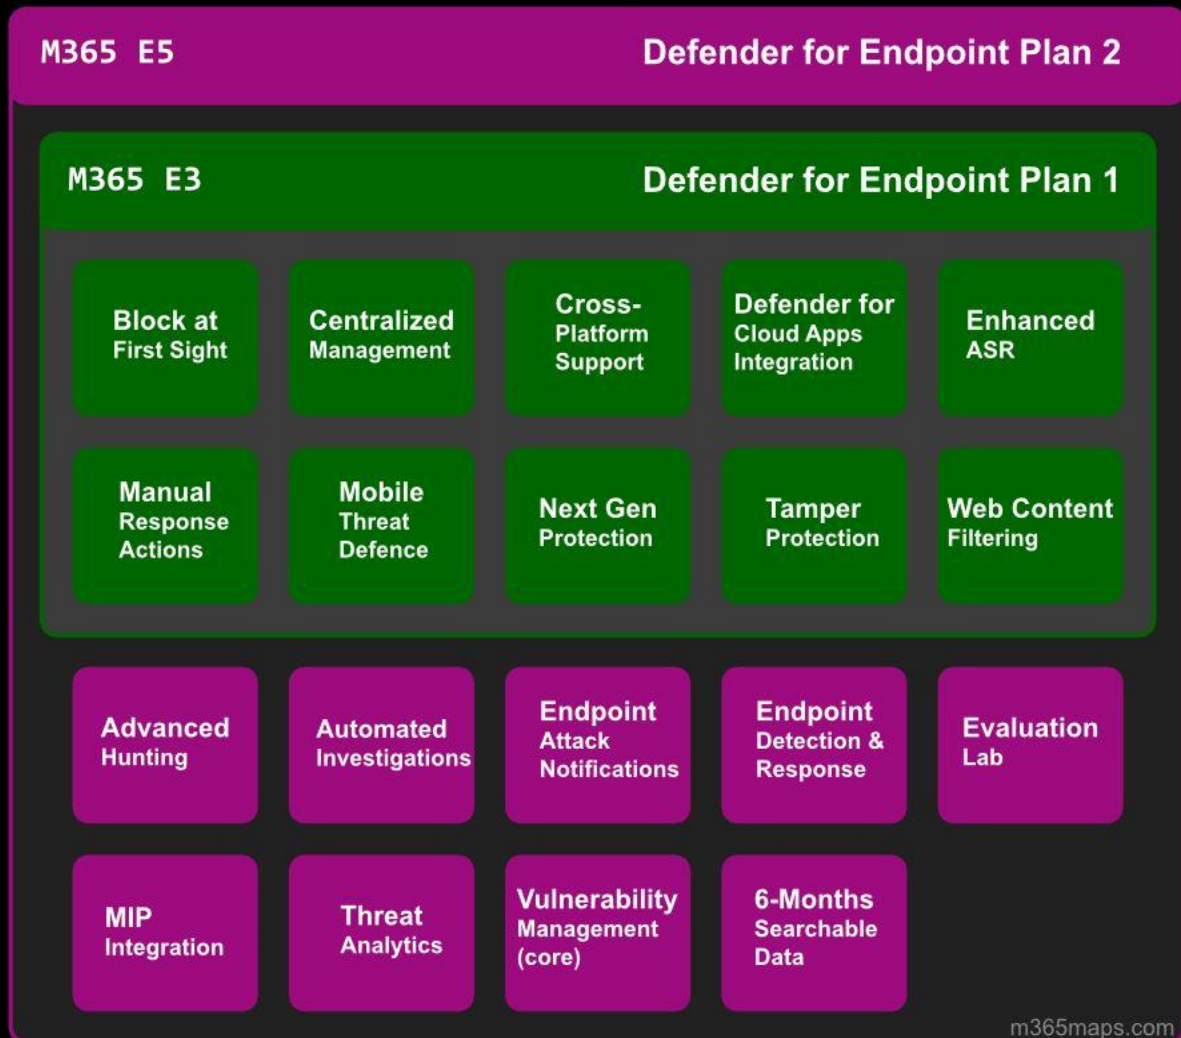

E7-nomics

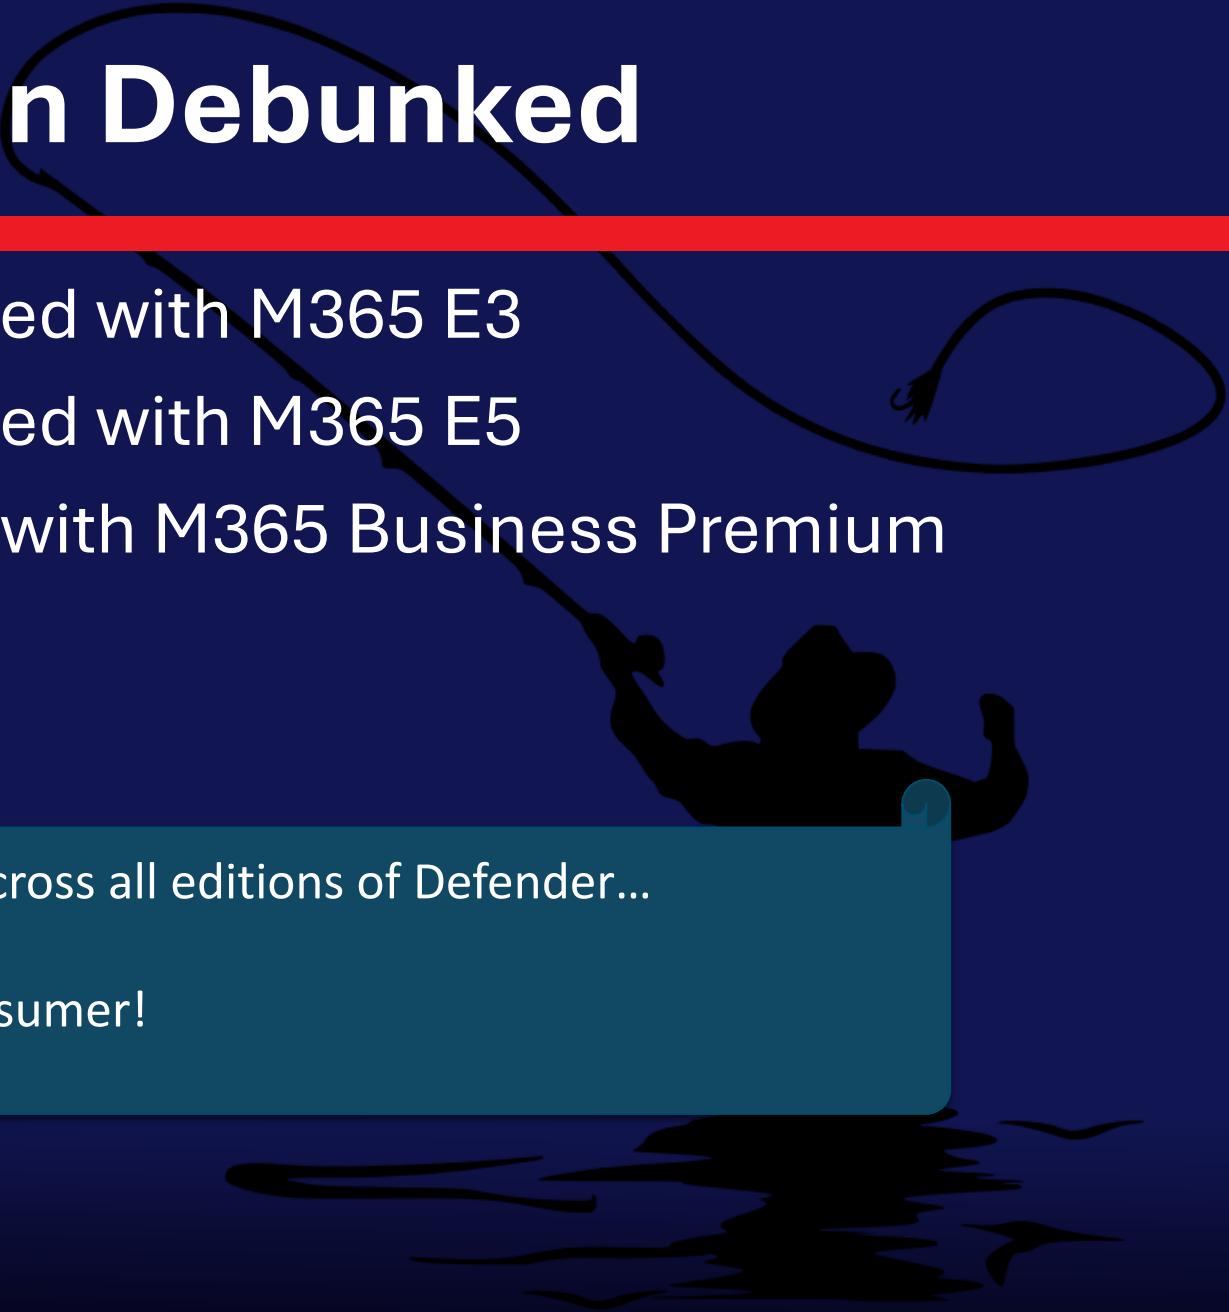

[Microsoft 365 E5 vs. E7: Is the AI Upgrade Worth the \\$99 Price Tag? – TrustedTech](#)

Feature	Microsoft 365 E5	Microsoft 365 E7
Licensing	Single-user enterprise license (Office apps, Windows, EMS E5). AI must be purchased as add-ons.	All-in-one SKU bundling E5, Copilot, Entra Suite, and Agent 365.
Cost	~\$57/user/month (Price rising to ~\$60 July 2026).	\$99/user/month (Bundle savings of ~15%).
Copilot AI	Not included (separate ~\$30/month add-on).	Included by default.
Identity	Entra ID P2 (formerly Azure AD P2).	Full Microsoft Entra Suite.
AI Governance	No built-in control plane for AI agents.	Agent 365 included for central management.

Defender Editions and Protections!

Licensing & Protection Debunked

- ◆ Defender for Endpoint P1 – Included with M365 E3
- ◆ Defender for Endpoint P2 – Included with M365 E5
- ◆ Defender for Business – Included with M365 Business Premium

The AV protection is **the same** across all editions of Defender...

Even consumer!

E3 vs E5: Feature Matrix at a Glance

Feature	E3	E5
Entra ID	P1	P1 + P2
Intune	P1	P1
Defender for O365	P1	P1 + P2
Exchange	P2	P2
Purview Compliance	Basic	Advanced
Phone System	X	✓
Audio Conferencing	X	✓
Identity Protection	X	✓
PIM (Priv. Identity)	X	✓
Power BI Pro	X	✓

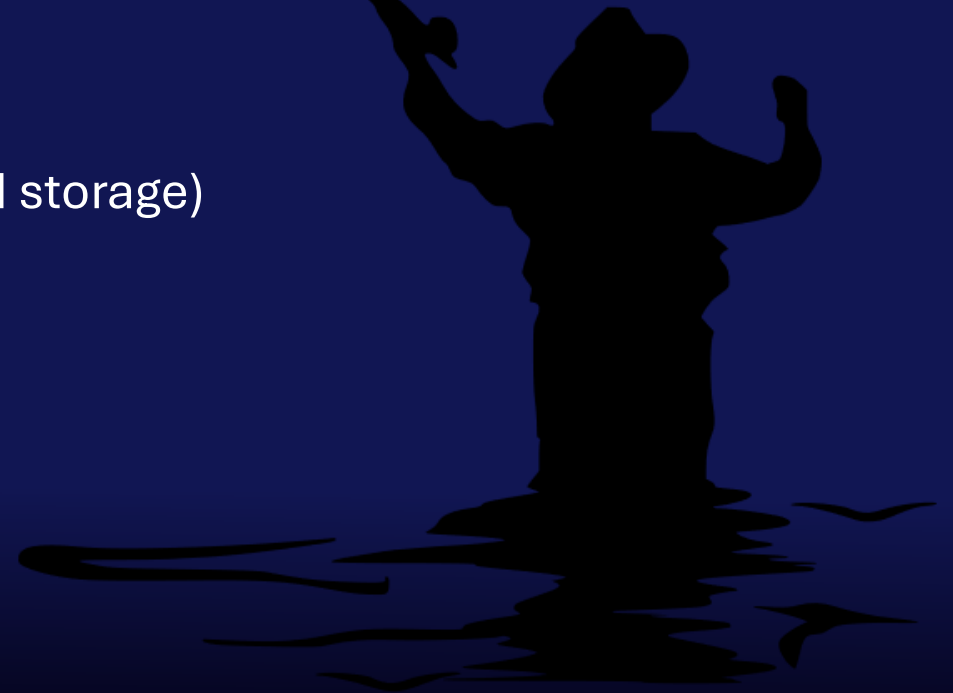

Plan 1 vs Plan 2, what's the difference?

Security Products

- **Plan 1** = Crucial Protections (the shield)
- **Plan 2** = Insights & Response (the magnifying glass)

Non-Security Products

- **Plan 1** = Core features
- **Plan 2** = Extended features (e.g. OneDrive P2 = unlimited storage)

The Deprecation Playbook, Visual Flow

Every deprecation is an opportunity to reassess, simplify, and consolidate

Microsoft Deployment Toolkit (MDT) - immediate retirement notice

Applies to: Windows 11, Windows 10, Windows Server

Summary

Microsoft is announcing the immediate retirement of Microsoft Deployment Toolkit (MDT). MDT will no longer receive updates, fixes, or support. Existing installations will continue to function as is. However, we encourage customers to transition to modern deployment solutions.

Impact

- MDT is no longer supported, and won't receive future enhancements or security updates.
- MDT download packages might be removed or deprecated from official distribution channels.
- No future compatibility updates for new Windows releases will be provided.

July changes to M365

New capabilities coming in 2026

	Business Basic Lightweight web and mobile apps to kickstart your business.	Business Standard Powerful web, mobile, and desktop apps to run your business.	Business Premium Everything your business needs to be more productive and secure.	Office 365 E1 Lightweight web and mobile apps, and basic security.	Office 365 E3 Powerful productivity apps, basic security, and identity management capabilities.	Microsoft 365 E3 Powerful Productivity apps with enhanced security and compliance capabilities.	Microsoft 365 E5 Best-in-class AI-powered productivity apps with advanced security, compliance, analytics, and AI readiness capabilities.

Tenant-wide versus per-user

Some stuff will do more than you intended

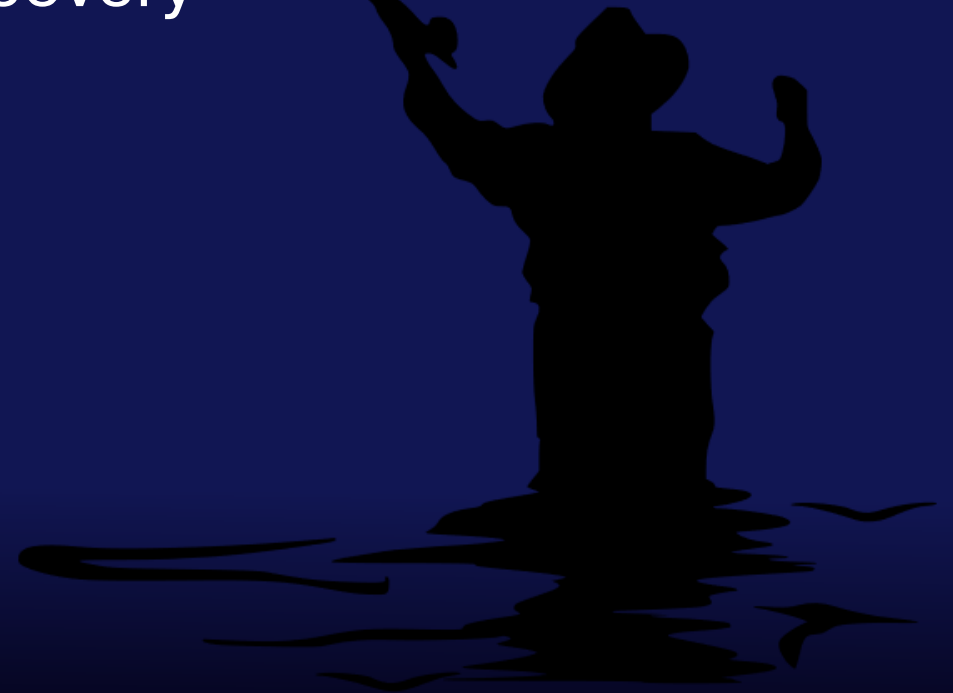

Some licenses unlock the whole tenant

Whole Tenant Unlocks

- ◆ Entra ID P1/P2
- ◆ Defender for Office P2
- ◆ Defender for Endpoint*
- ◆ Defender for Identity
- ◆ Purview DLP
- ◆ Auto-labelling
- ◆ Entra ID Governance
- ◆ Defender Vuln MGMT

Per-user unlocks

- ◆ Defender for Office P1
- ◆ eDiscovery

The important thing to note

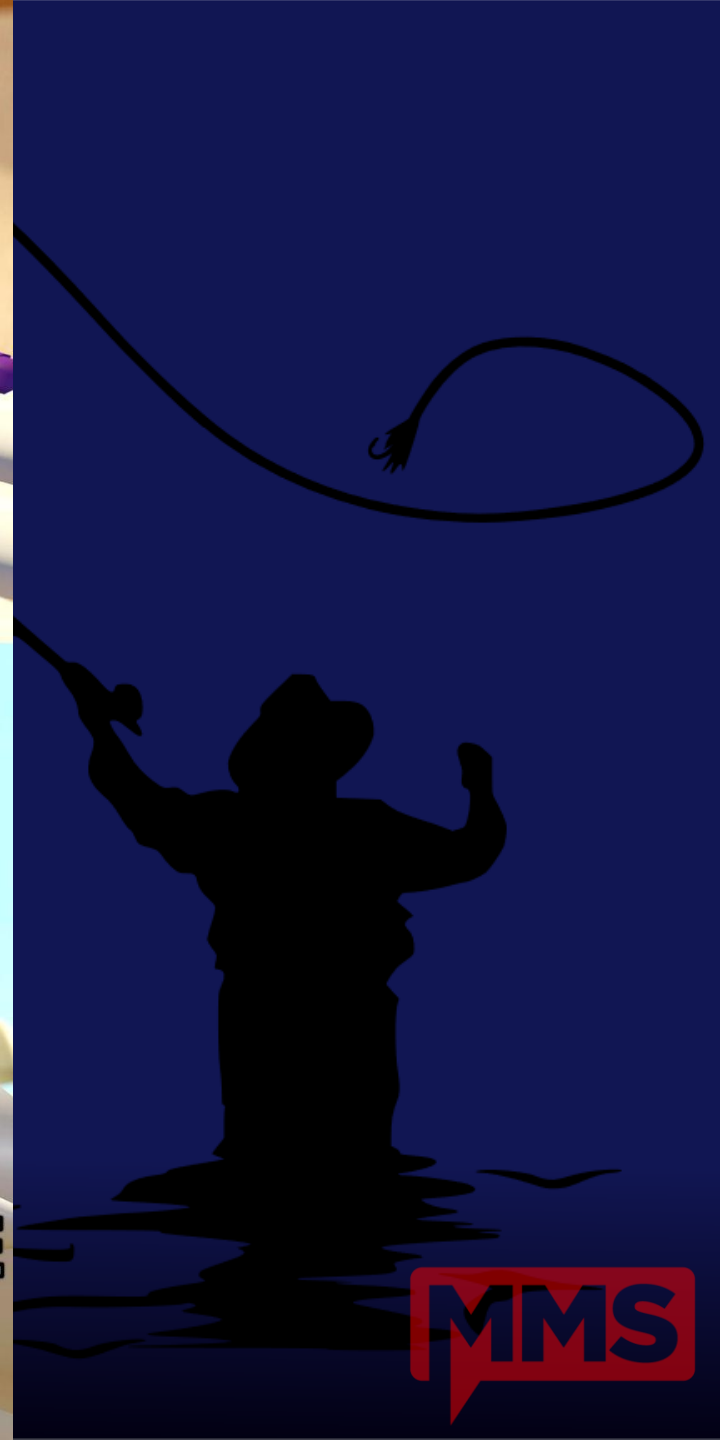

Licensing the Online Services

Customer must acquire and assign the appropriate subscription licenses required for its use of each Online Service. Usage exceeding the Online Service's documented entitlement(s) and/or usage limits require additional purchase of licenses to cover overage. Each user that accesses the Online Service must be assigned a User SL or access the Online Service only through a device that has been assigned a Device SL, unless specified otherwise in the Online Service-specific Terms. [Subscription License Suites](#) describes SL Suites that also fulfill requirements for User SLs. Customer has no right to use an Online Service after the SL for that Online Service ends.

- ♦ That means you need Entra ID P2 for every user that benefits

THERE SEEMS TO BE NO SIGN OF LICENSE COMPLIANCE ANYWHERE

Entra ID usage insights

◆ Entra ID > Billing > Licences

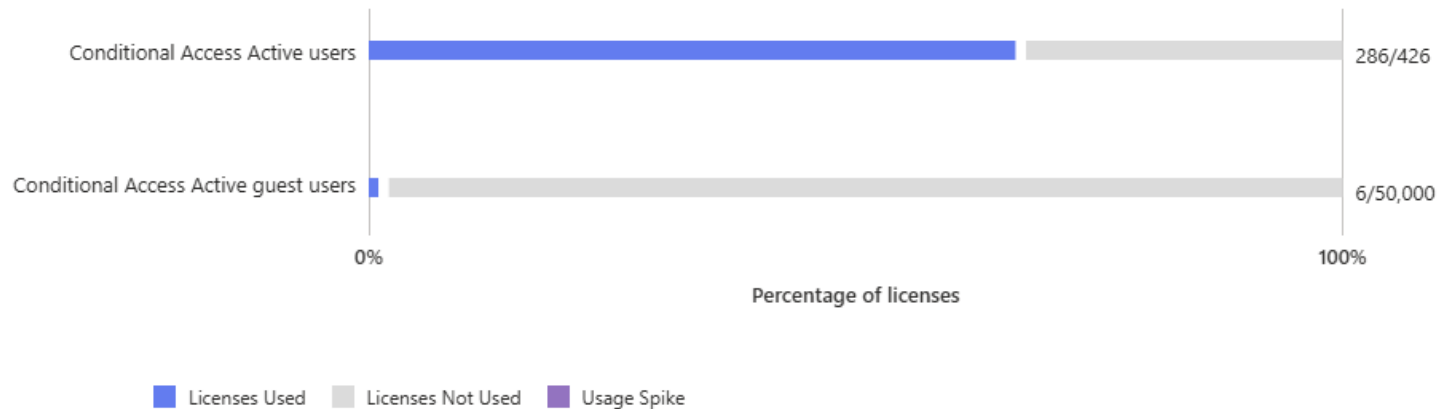

Product usage insights

Monitor license usage to maximize your Entra plan. Data shows last month's feature usage based on your entitled licenses (may take up to 3 days to update). Additional eligible features will appear over time.

Entra ID ID Protection

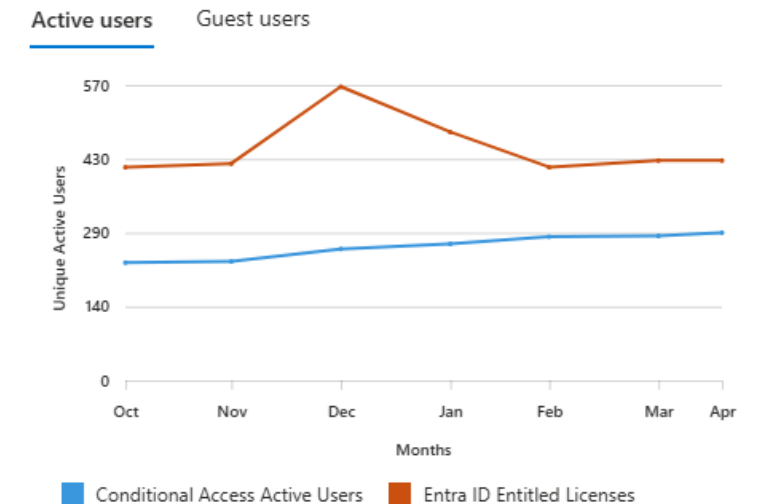

March feature usage report

Your tenant's feature usage for last month.

Monthly usage patterns

Tenant feature usage over the previous six months.

eDiscovery info

- When a user or admin performs an audited activity, the system generates an audit record and stores it in the audit log for your organization. The length of time that an audit record is retained (and searchable in the audit log) depends on your Office 365 or Microsoft 365 Enterprise subscription, and specifically the type of the license that is assigned to specific users.

<https://learn.microsoft.com/en-us/purview/audit-search>

SharePoint Total Storage Calculation

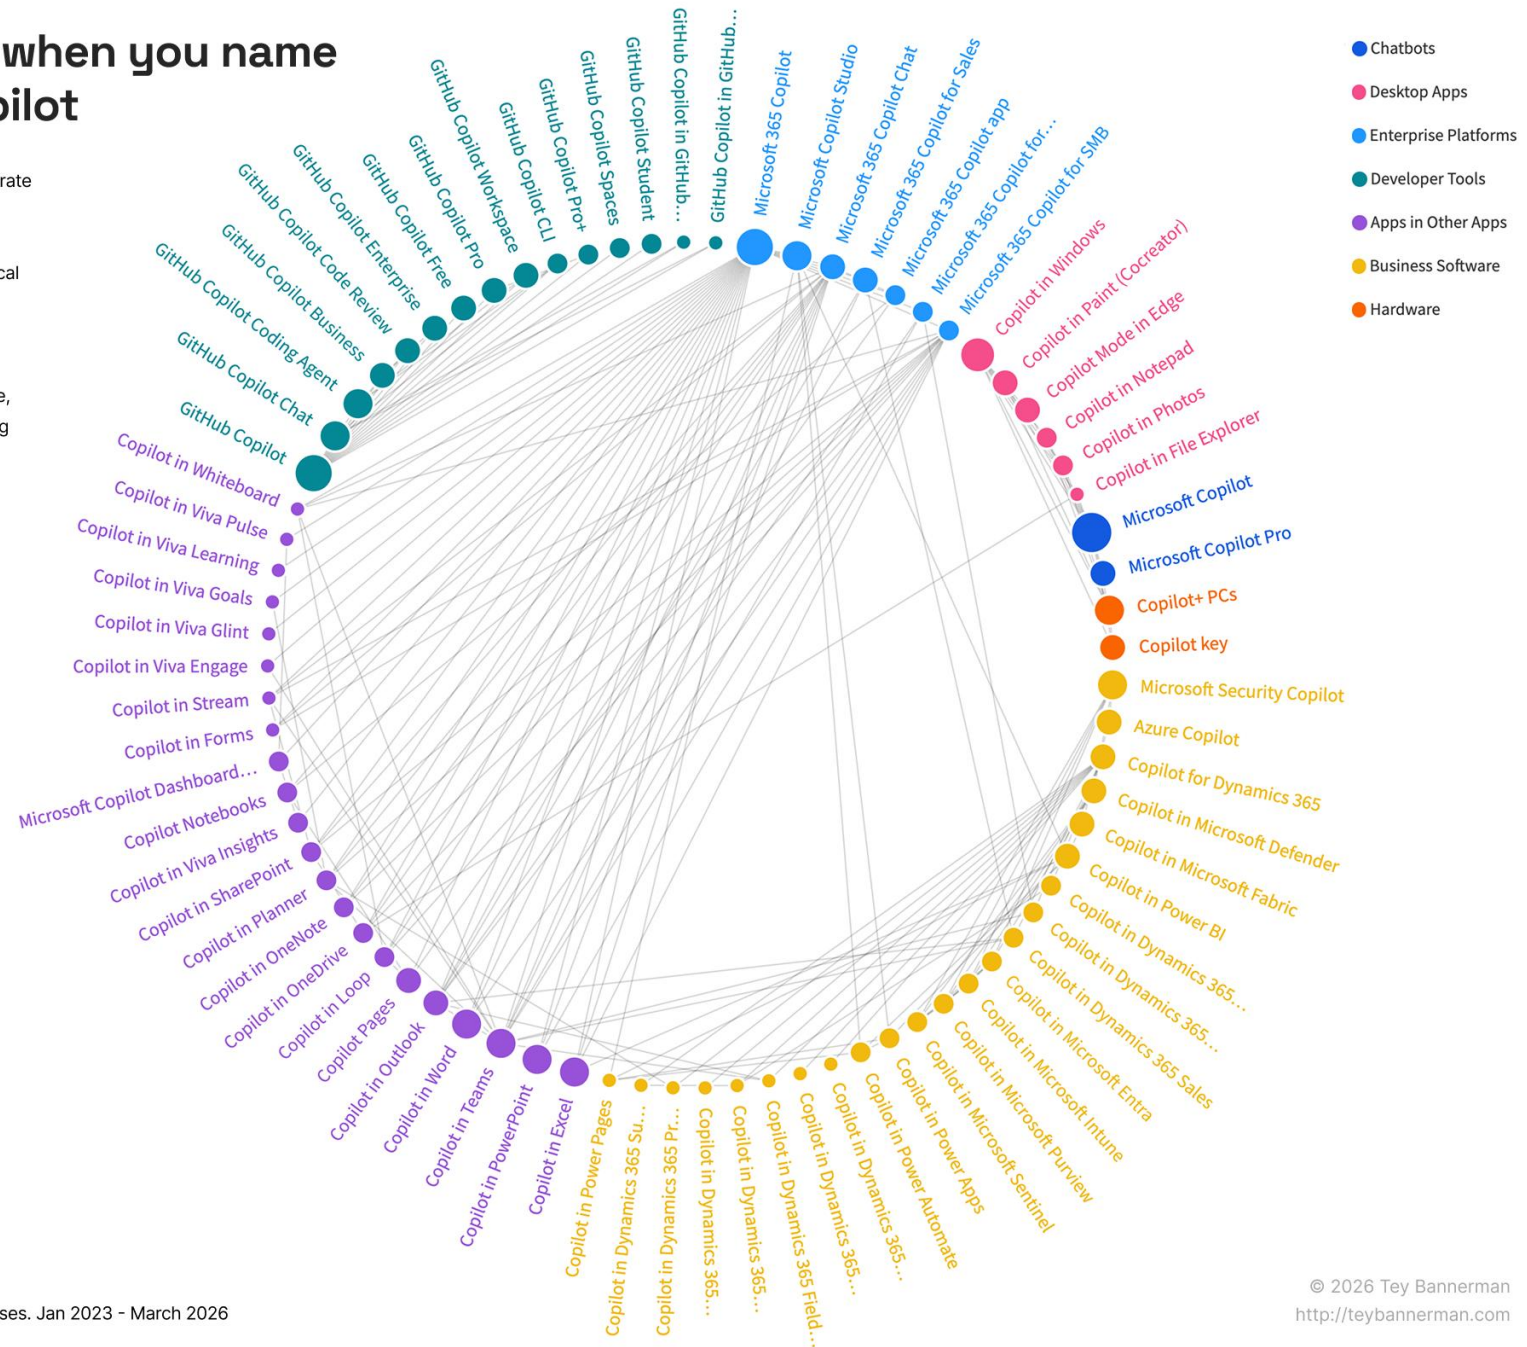

- ◆ Each tenant gets 1.5TB with any SharePoint P1 license
- ◆ The tenant gets 10GB of additional storage with each licensed user
- ◆ SharePoint Online Credits is a SKU that allows expansion beyond those limits
- ◆ SharePoint Archive

“SharePoint storage is expensive” ... It’s not just storage

Copilot has... grown legs

Which Copilot are *most users* asking for?

- ◆ They don't know
- ◆ You don't know
- ◆ But it's probably:
- ◆ M365 Copilot
- ◆ And more recently, Cowork

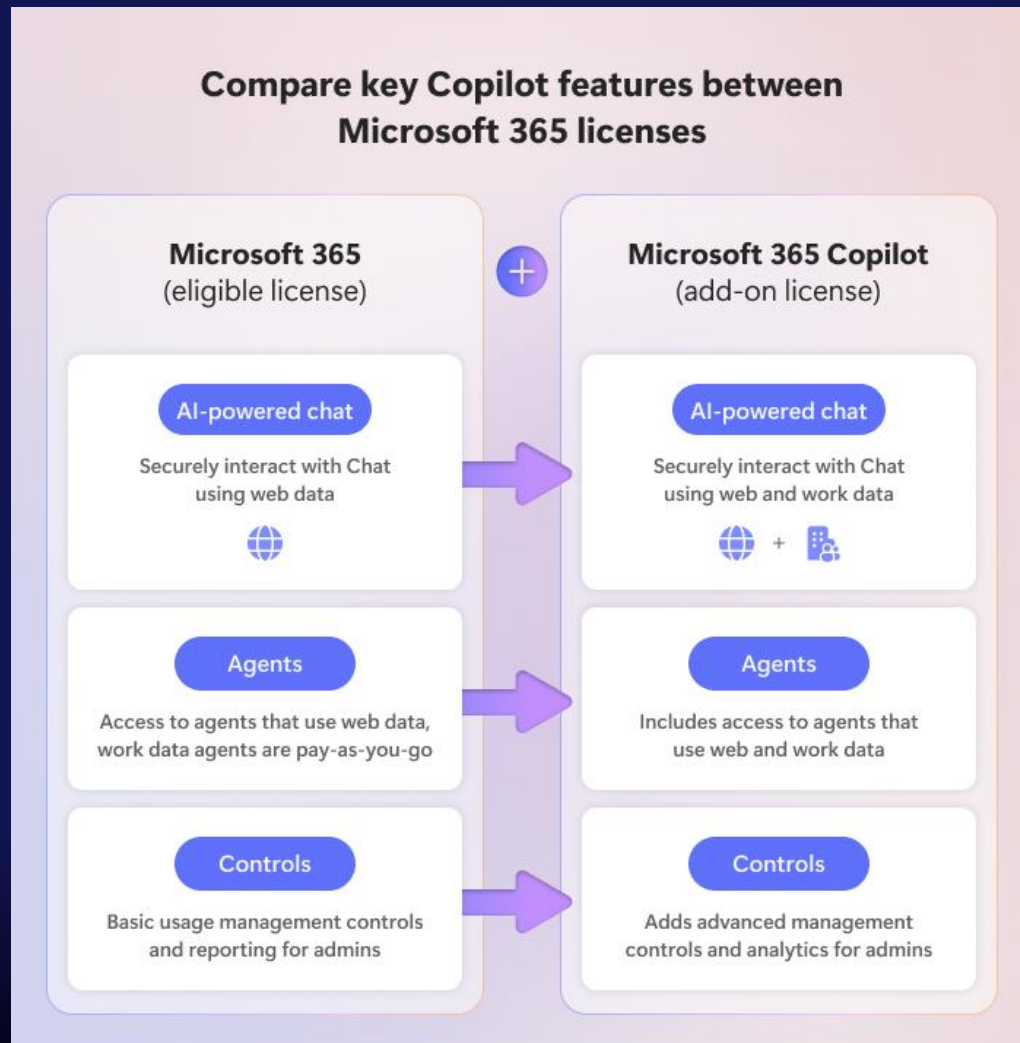

Copilot Prerequisites + Opinions

- **License required:** M365 E3/E5, Business Standard, or Premium
- **Identity:** Entra ID (no Copilot without cloud identity)
- **Storage:** SharePoint Online + OneDrive
- **Data:** Must be in M365 (not on file shares)
- **Governance:** Sensitivity labels matter as Copilot surfaces anything it can see

Copilot chat **is not** M365 Copilot

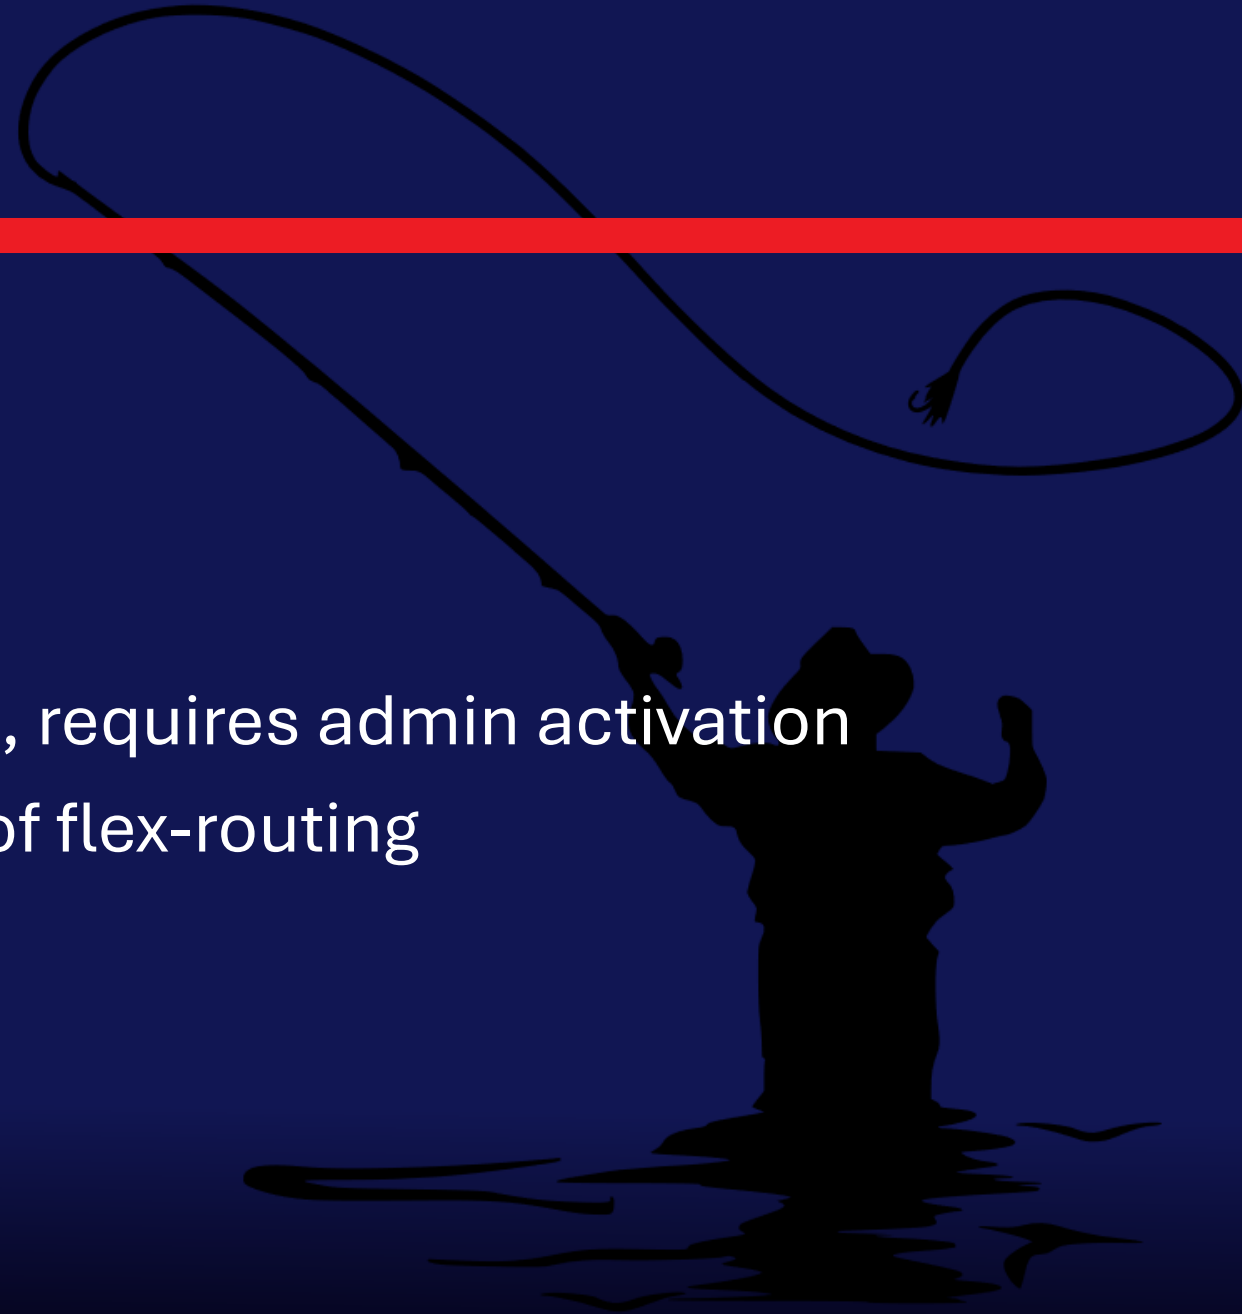

- ◆ Chat is for the Microsoft-guarded chat experience
- ◆ M365 Copilot is for the in-app experiences connected to business data

[Decide which Copilot is right for you | Microsoft Learn](#)

Copilot Cowork

- ◆ Action-based output
- ◆ Part of the Frontier Experience
- ◆ Brings experiences like
 - ◆ Model Council
- ◆ Available as part of M365 Copilot, requires admin activation
- ◆ EU customers need to be aware of flex-routing

Model Council

The screenshot displays the M365 Copilot interface. On the left is a sidebar with navigation options: Search, Chat (selected), Agents (Researcher, Analyst), Conversations, Pages, Notebooks, Create, and Apps. The main area features a 'Researcher' header with the 'Auto' model selected. A dropdown menu for the model selection is open, showing options: Auto (selected), Model Council, GPT, and Claude. Below the header is a search bar with the text 'What do you want to research?' and a 'Sources' button. At the bottom, there are tabs for Home, History, Reports, Saved, and Shared. A grid of six task cards is visible: 'Create a daily briefing', 'Research a topic', 'Comparative analysis', 'Research brief', 'Competitive analysis', and 'Create a plan'. The user's name 'Erika Fuller' is shown in the bottom left corner.

Top Areas of Agreement

Topic	GPT	Claude
Battery life priority	Cited by Marcus Webb and Brian Kowalski; Phase 2 self-powered fiber directly addresses top pain point	8/10 customers mentioned battery anxiety; critical path validated by customer demand
App UX debt	3/10 customers cited clunky setup, Bluetooth drops, data-heavy reports; 2026 app investment confirmed	7/10 customers raised app friction; critical UX debt undermining hardware innovation
Healthcare certification gate	Phase 3 FDA 510(k) targeting 2H 2027; IRB studies starting late 2026 required for clinical credibility	Phase 3 medical certification primary unlock for B2B enterprise expansion
Predictive analytics ROI	Tomas Reyes lost \$400K to preventable injuries; 85%	Highest ROI feature for B2B segments; justifies premium

CONTRACT

The Microsoft way of detecting Shadow AI

- ◆ First: Microsoft Defender Cloud App Discovery
 - ◆ Included in Entra ID P1 (Business Premium)
 - ◆ Takes signals from Defender for Endpoint
 - ◆ Shows you what's going on
- ◆ Then: Microsoft Defender for Cloud Apps
 - ◆ Included in M365 E5, or add-on
 - ◆ Allows you to set alerts and actions on observed traffic/behavior

Kiosk – for Nick

- ♦ For a Shared Device if users need Office Desktop apps
- ♦ Give everyone an M365 F3 license
- ♦ Give the DEVICE an M365 Apps for Enterprise with Shared activation

Kiosk – for Nick

Device-based licensing for Microsoft 365 Apps for enterprise

Summarize this article for me

Commercial customers can use *Microsoft 365 Apps for enterprise (device)* to assign a Microsoft 365 Apps for enterprise license to a Windows client device instead of to a user. Education customers can do the same thing by using the *Microsoft 365 Apps for Education (device)* license. This device-based license is designed to simplify management of Microsoft 365 Apps for enterprise on devices shared by many users. Anyone that signs in and uses that device can use Microsoft 365 Apps for enterprise to create and edit documents.
