Introducing User Experience Sync

Shared mode

- ✓ Standard experience – User app data and Windows settings are deleted after each session
- ✓ Supports any number of users on a shared Cloud PC, one at a time
- ✓ Ideal for task-based workers where apps don't require saving user data or built-in personalization

Shared mode with User Experience Sync

- ✓ Personalized experience – User-specific app data and Windows settings are stored in the cloud
- ✓ Seamless user experience, included with existing Windows 365 Flex license (limits apply)
- ✓ Easy to deploy and manage – no complex infrastructure or set-up requirements
- ✓ Ideal for any employee that needs occasional access when apps and settings personalization is needed

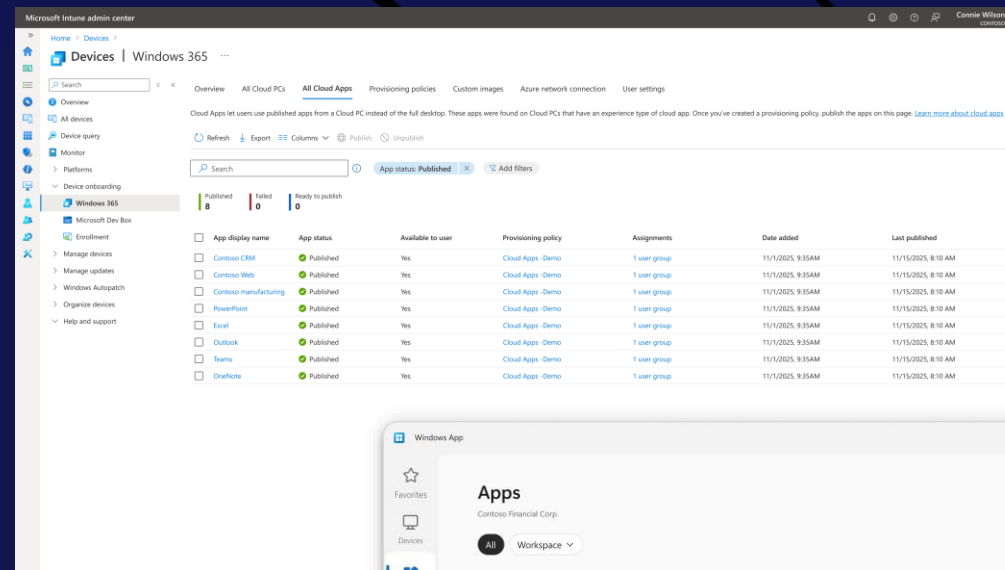

Windows 365 Cloud Apps

Windows 365 Cloud Apps give users access to specific apps, instead of a full Cloud PC

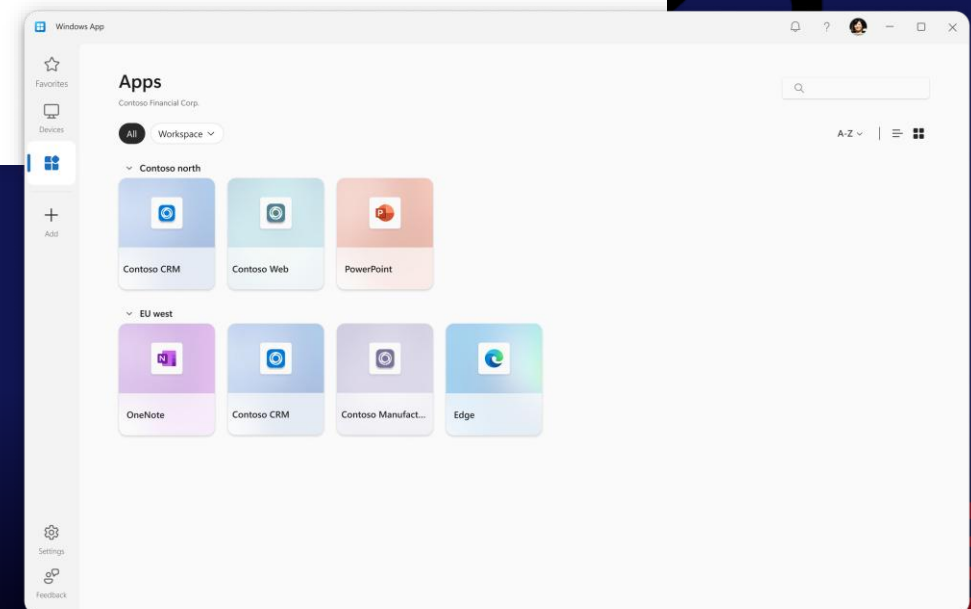

Simplified app access with the Windows App

Unified app deployment with Microsoft Intune

Easier administration, more flexibility
