Processes and threads

- In Windows a process can't really do anything
- Task Manager only shows processes
- Threads can actually do something
- Search engines probably know the answer to your question so the real problem with them is **noise**
- How to get rid of noise?
- Make your searches more accurate
- Make sure you get results from people who have at least a clue what they're doing
- Learn to diagnose threads instead of processes

Story of Järjestelmänvalvoja

**When hitting for
#1, I choose
jokes
beforehand, and
build the content
around it**

Storify Everything

- ♦ “The phonology and grammar of Quenya are influenced by Finnish”

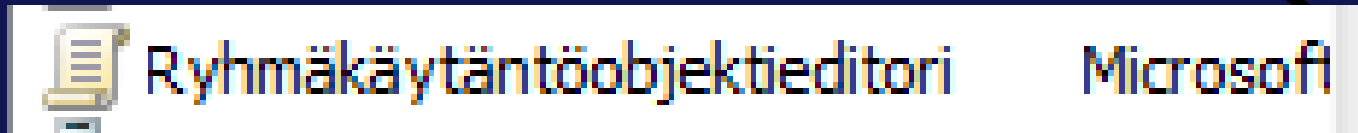

Can you spell this?

When you get Administrator
we get

JÄRJESTELMÄNVALVOJA

You get *gpedit.msc* and we get...

Making people remember you

- ♦ On my 75 minute breakout sessions I'll exchange business cards for swag (BRK3295 and BRK4021)

Admin Rights are not Human Rights

**Storify
everything**

Empirical Research

- ◆ After years of extensive research I've done on teaching, I found out that:

People learn more if they are awake!

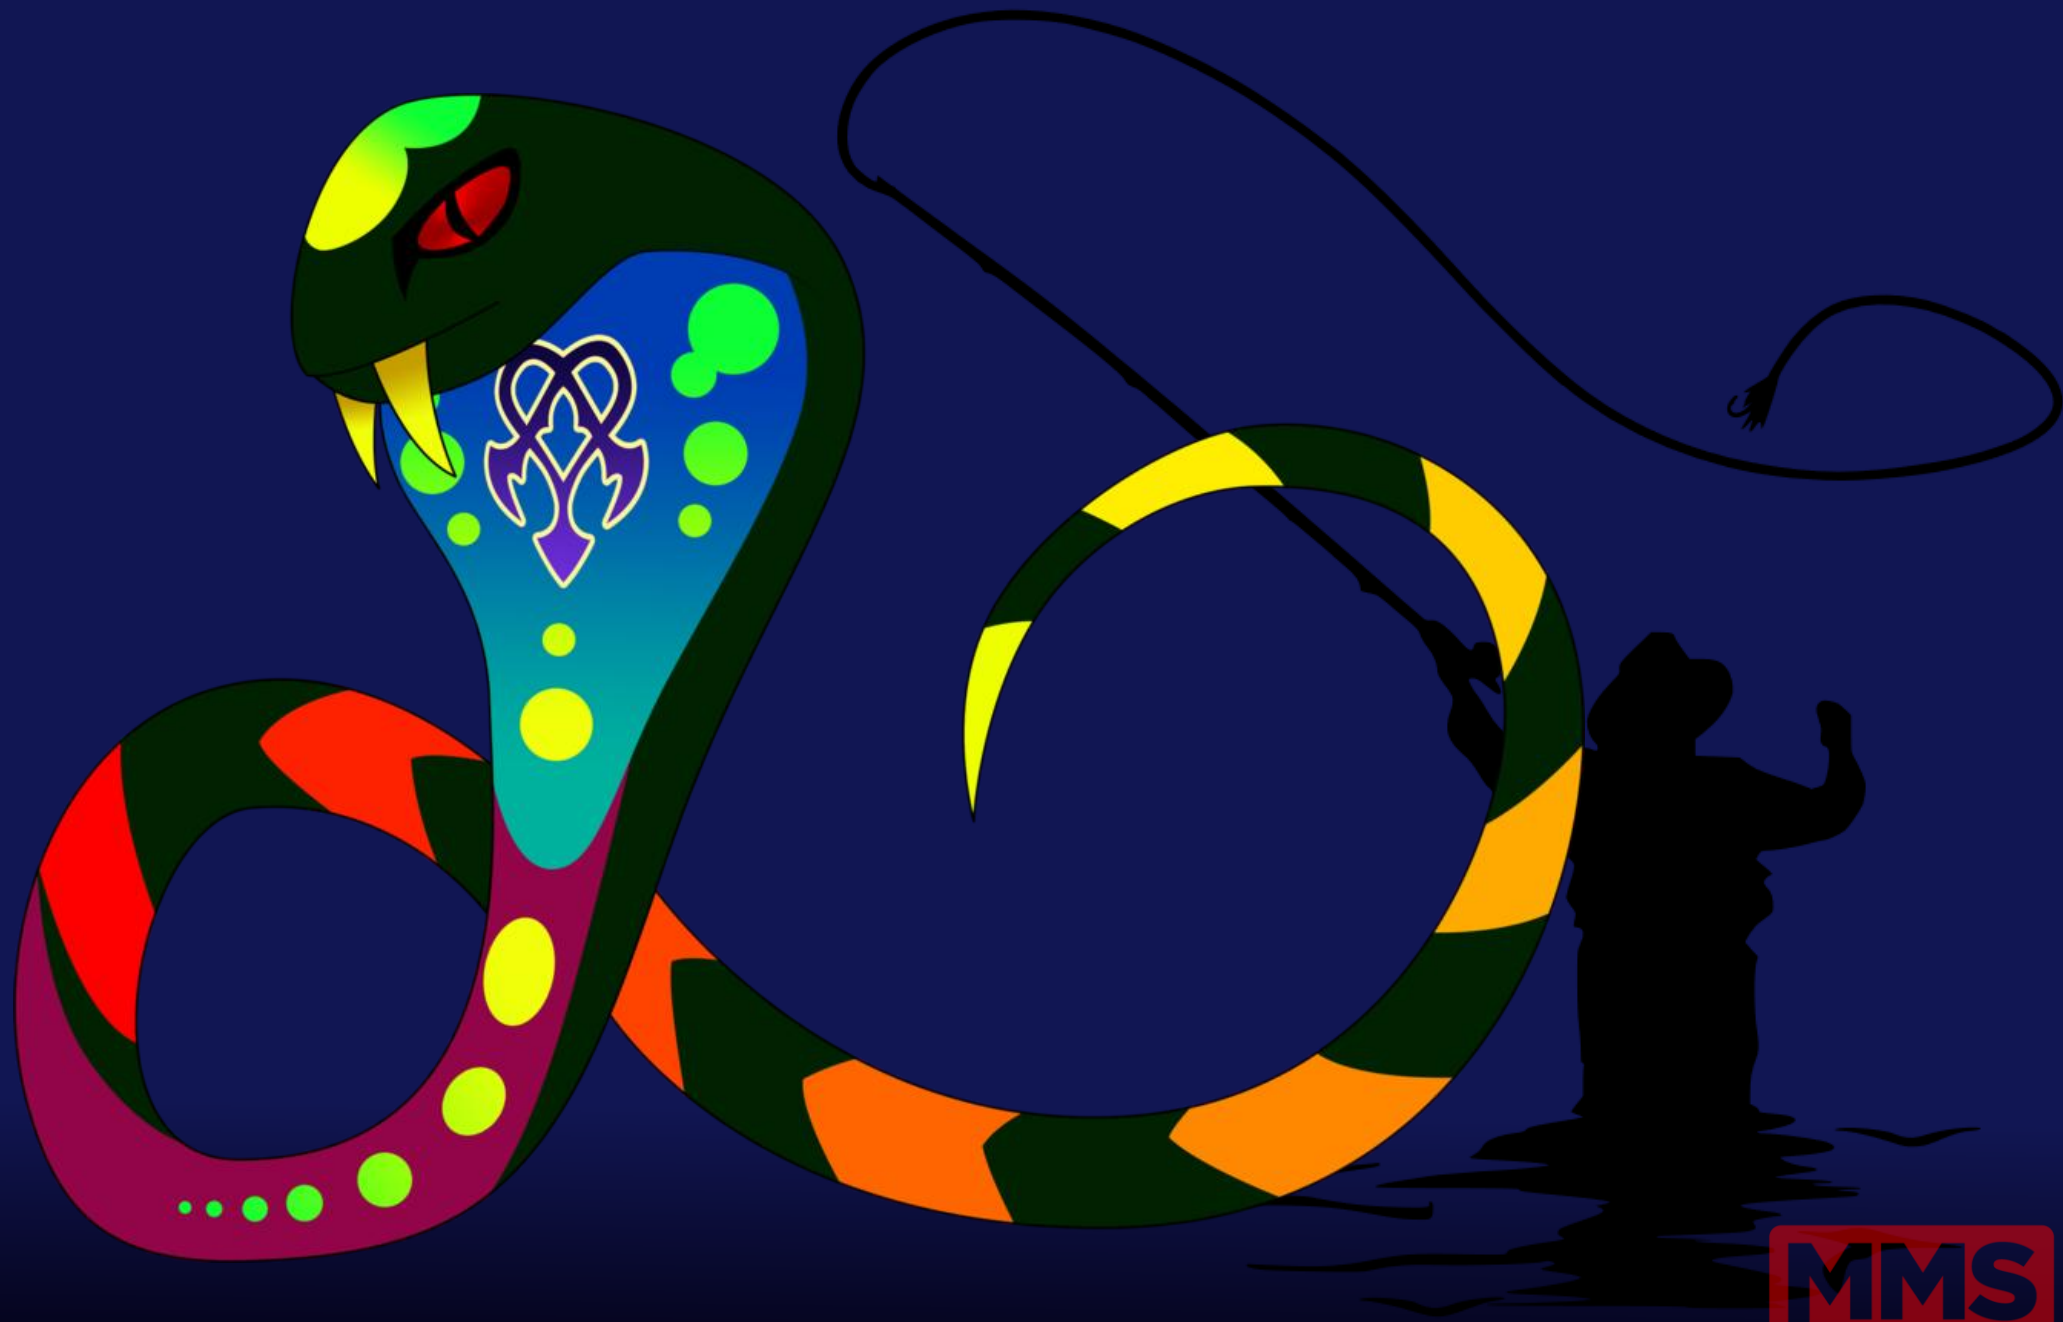

There are only a few things...

- ◆ On Every training I've ever done, there are a few things that the evals say:
 - ◆ "The Teacher actually liked the stuff he spoke about"
 - ◆ "For once we had enough brakes"
 - ◆ "The teacher was realistic about Microsoft"
 - ◆ "The stories were great and on topic!"
 - ◆ "First time someone actually took time to explain the concepts and reasoning"

**Stories are good but WAR-
stories are better!**

**Add tips that get the
“WOW” effect**

Companies need ROI for sending people to conferences

Peoples' hearts are won by giving something personal

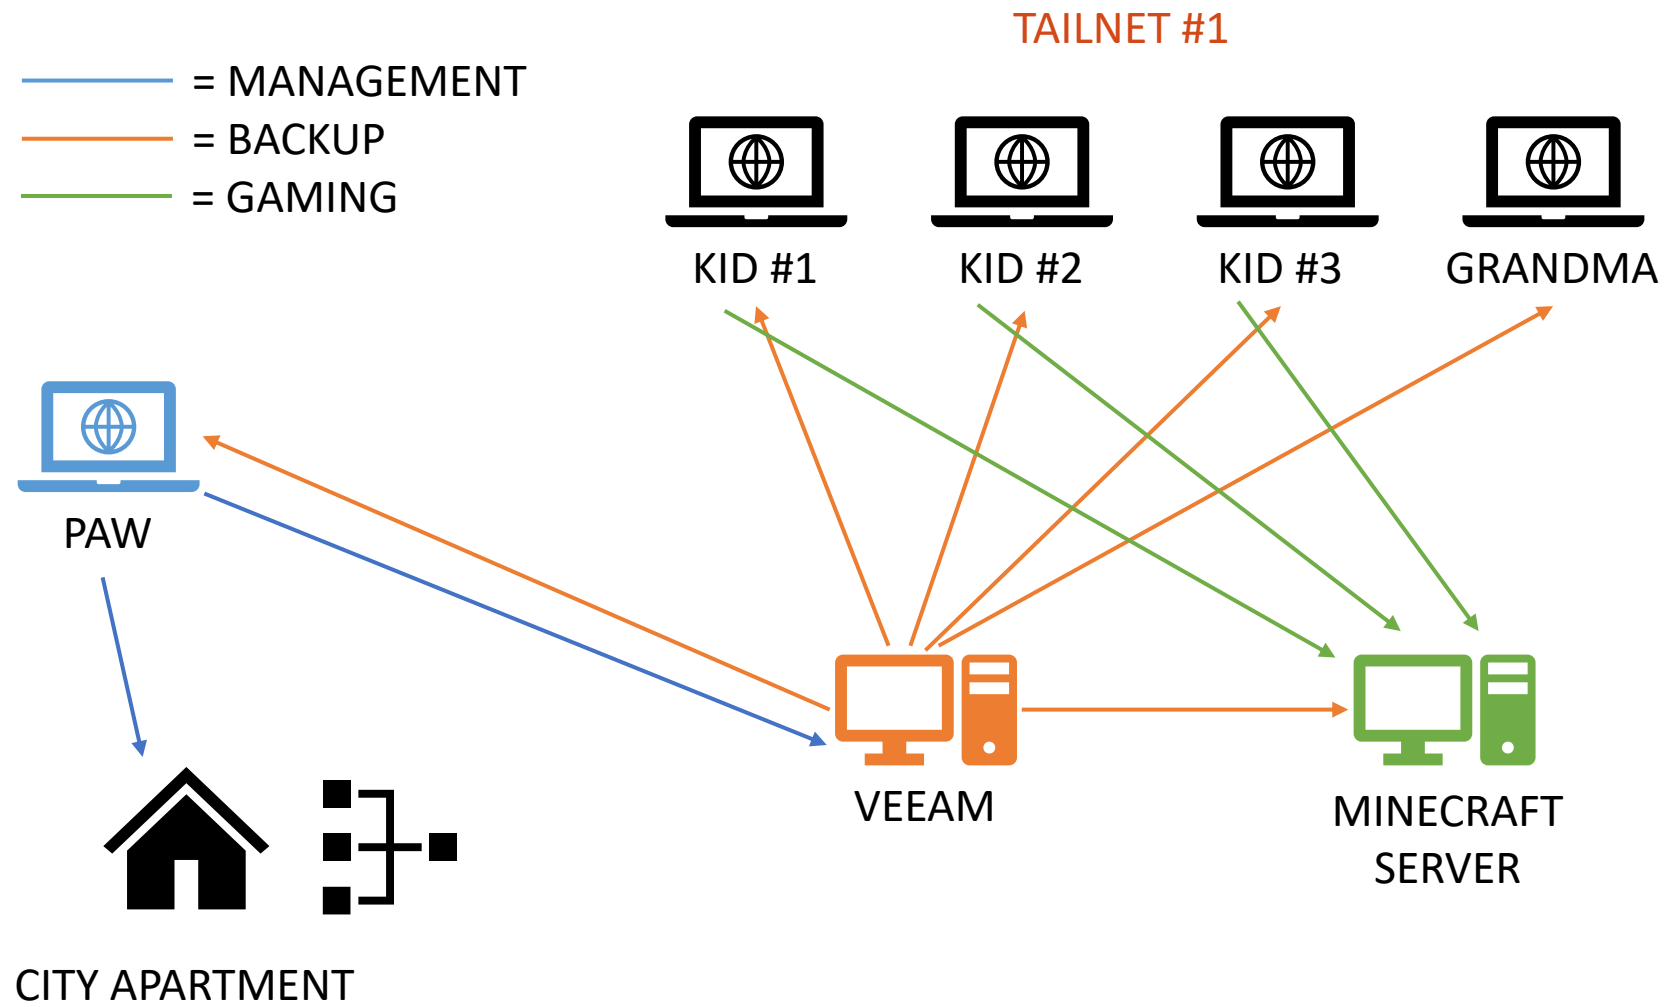

Personal

- ◆ This way your computer works better
- ◆ This way you can watch free Netflix
- ◆ This way you can have your WLAN work better
- ◆ This way you can reset the password your grandma forgot
- ◆ This way you can protect your family
