

Real-World Insights From Microsoft Purview Implementations

Agenda

- ◆ Field notes and lessons learned
- ◆ Latest advice for an evergreen service
- ◆ No-nonsense, straight to the point
- ◆ Real world lessons
- ◆ How to ensure project success

Microsoft Security Product Portfolio

MICROSOFT PURVIEW

Microsoft Purview

Microsoft Purview is a unified data governance and compliance platform.

Microsoft Purview helps you:

- Discover where your data lives
- Classify what's sensitive
- Protect it across Microsoft 365 and beyond
- Comply with regulations

Microsoft 365 Copilot

Monitor AI-related activities, users, and data flows to understand where sensitive or personal data may be at risk. Includes insights into AI tool usage, classified data exposure, and user behavior patterns.

Oversharing AI

Policies with AI workloads

List of one-click policies created via DSPM

Oversharing AI

AI Usage & Risk

Monitor AI-related activities, users, and data flows to understand where sensitive or personal data may be at risk. Includes insights into AI tool usage, classified data exposure, and user behavior patterns.

Oversharing AI

Data risk report for unprotected sensitive data

Understand where sensitive data lacks protection, who's interacting with it, and how AI tools are involved.

Exfiltration

Top risk-related activities on sensitive assets

Review users performing top risk-related activities on unprotected sensitive assets.

Exfiltration

Data security risk insights

View consolidated insights about sensitive data and user risk patterns in your organization

Data discovery

Label distribution and adoption

Understand how sensitivity labels are applied across email, files, and collaboration workloads so you can close adoption gaps before AI experiences surface sensitive data.

Labeling Protection

Auto-labeling policy coverage

Measure how automated labeling policies protect sensitive data, from coverage across workloads to policy state and automation versus manual application.

Labeling Protection

Sensitivity label changes

Understand changes in your organization's label posture caused by users downgrading or removing labels.

Most triggered DLP rules and activities

Summarizes the most frequently triggered DLP rules, related user activity, and actions taken to protect data.

Most triggered DLP policies

Highlights the most frequently triggered DLP policies across data sources and pinpoints where user activity is most sensitive.

Top users triggering DLP policies

Shows which users most often trigger DLP policies and spotlights patterns of repeated activity across data sources.

AI observability

Get a centralized view of agent activity across your organization.
